

Company Overview

TurFresh is the Leader in Artificial Turf Cleaning, Grass Cleaning Products and Services

Since 1999, TurFresh has demonstrated complete dedication to serving the artificial grass community through thousands of successful artificial grass restorations, repairs, maintenance programs, and coming up with our own line of innovative artificial grass cleaning products.

With our exclusive BioS+ Enzyme Technology created for our turf cleaners, they treat the odor-causing compounds and stains deep within the turf or other surfaces that have had organic waste. TurFresh™ & BioTurf™ with BioS+ product lines provide immediate relief from unpleasant smells with enzymes that bind to these odor-causing molecules, reducing their pungent smells and creates a fresh scent.

Company Mission

TurFresh's mission is to provide the most innovative artificial grass cleaning products and services that not only brings back the lush look of your artificial grass but also removes any odor your pets may leave behind.

Company Vision

To be a nationally recognized artificial grass care products and services company revolutionizing the artificial turf industry with our innovative pet odor removal, cleaning products and artificial grass maintenance and rejuvenation or artificial turf cleaning services.

To become the preferred vendor for artificial turf cleaner and networked turf maintenance programs.
